

MONITOR SIZE COMPARISON GUIDE

The following compares the difference in sizes between the 16:9 aspect ratio monitors we carry. This guide should be helpful to determine which size monitor will meet your event needs.

MONITOR SIZE COMPARISON TABLE

MONITOR SIZE	WIDTH	LENGTH	AREA (SI)	AREA (FT)
40	34.86	19.61	683.68	4.75
50	43.58	24.51	1068.25	7.42
60	52.29	29.42	1538.28	10.68
70	61.01	34.32	2093.77	14.54
80	69.73	39.22	2734.72	18.99

NOTES

1. Audience Distance from Screen: For readability, neck and eye comfort, the 2 x 10 rule applies. No one should be seated closer to the screen than 2 times the screen height or further from the screen than 10 times the height of the screen. For example, if the screen is 8' high, the first row is set at 16' away from the screen. The last row should be no further way than 80' away from the screen. This presumes your slides are created with a 24 point font – if these rules are applied, someone with 20:20 vision can comfortably view your slides for a sustained period.
